I really liked the look of this lad and so wanted to award the Hibernian but this lad was extremely difficult to assess and was extremely unhappy and didn't mind letting us know, He is a big lad who appeared to have good width depth chin, I was unable to assess bite correctly, he had lovely type with very good shape set to his greeny colour eyes, his ears were well supported by his cheek bones although he was tending to hold them to side slightly as he was so cross, his coat felt lovely and he had excellent bone, flowing tail. Sorry.

2nd Mrs Frizelle GRPR ISHCUS ARCTURUS (MCO e 03 22) MN dob 26.7.16. This lad was very unbalanced, he lack a shallow concave curve which made his head appear quite long, his head also lacked width making it appear narrow, although his cheek bones supported his ears he was holding them upright, his eyes were of good shape set, his head needs to catch up with his body, muscle tone needs to develop he had good bone with tail balanced his coat was coming in but nicely groomed.

1st GRCH W/H Mr&Mrs Taylor CH BACKCHAT ALICE SPRINGS (BUR g) F dob 21.4.16. An eel of a girl please watch those claws, sorry to withhold but for me she didn't come up to the standard, I would prefer more width to top head, and she lacked that nose break which made her head appear longer, she had a medium wedge and for me she had slightly narrow head she was also slightly undershot, her eyes were of quite nice shape, I would prefer her bigger her coat was short and close lying.
