Young girl very well grown. Long body has good muscle, she has recently had a growth spurt I would think. Substantial legs and large well tufted paws, long furry tail balances. Lovely coat has good length, ruff and breeches developing well, very good pattern with pure white bib and feet. Well shaped head, square muzzle, large tall ears which she holds well, long tufts and streamers from ears. Full expressive eyes showing alert expression.

The other girl in this class CH UNICUM TESLA also had style but I felt that her muzzle lacked the desired squareness required. However she is still young and developing. I very much liked her overall type and bone structure, also she has a lovely coat of good length with ruff and breeches, lovely bright colour and defined pattern. Long furry tail. Balanced head with well set ears, very nice eyes and expression.
