Huge thanks to Ronnie Carmel and their teams for the invite to judge and their huge hospitality during my stay. Not a big entry but a quality one so I had a lovely day. Thanks also to my steward (sorry I didn't get your name) but it was his first time and he did a sterling job.

Just old enough to be in this class and looking a bit like a big kitten. She has a weighty muscular elegant body and stands tall on slender limbs that finish in neat oval paws, with balancing length to her well shaped tail. Her needs time to mature and develop but shows promise and has a gently rounded top to her head between well spaced correctly shaped large ears that have a broad base and rounded tips and are set with a slight forward tilt their outer line following the outline of her wedge. In profile she has reasonable depth to her head and a nicely rounded brow with a fair break to her short straight nose that is in a straight vertical plane to her firm level chin is firm. Her wedge is short and fairly broad and just shows a slight whisker pinch. She has large lustrous yellow eyes that have very good shape and set with the top line slanting towards the nose and a fuller more rounded lower lid, set wide apart giving a lovely Asian expression. Her coat is quite short and lays well with a pleasing shine and shows cool chocolate ticking on a pale ivory base, she has attractive tabby markings to her face with an M on her forehead, pale spectacles with dark brown mascara, pencilling to cheeks, broken necklace and solid tip to tail. I wondered whether she was actually brown and not chocolate as although her coat markings a pale they are a little cool and she has deep dark brown paw pads. A shy girl who wasn't showing herself to her best but still allowed me to handle her.

Wow! My take home cat of the day. Most beautifully balanced baby of lovely type and when I saw who Dad was and who I first judged as a kitten I could see where she gets her good attributes from. She has an elegant medium to long body of good weight and muscle tone. She has long slender limbs that end in dainty rounded paws with good thickness and length to her tail that ends in a rounded tip. She has a lovely balanced head that sits on an elegant neck and has a moderate wedge with a nicely rounded muzzle that flows back into the contours of her head with uniform width to her nose. Her ears are medium in size and sit on a broad base with very good width between, they are cupped forward with their outer line following the line of her face. Her profile shows a gentle curve to her brow and slight contour to her nose, with good depth to her chin and a level bite. She has large expressive yellowy green eyes that are shaped like rounded almonds and are set well apart under a straight brow giving her a real worried expression. Nice texture developing to her clear silver coat that is short dense and close lying and has excellent contrast with lots of randomly placed black spots all over her body, tummy and descending into tiny spots on her legs, which are barred and paws. She has pale spectacles with black mascara effect around her eyes and well defined pencil lines on her cheeks and broken necklaces. She has an M on her forehead with a complex scarab which extends into lines over her head and down to her spine which then break into elongated spots and merge to form a dorsal stripe, which runs to the tip of her tail which has a solid tip and pleasing barring. She is beautifully balanced and has a calm disposition.

I did like this blue tortie who is litter sister to the above and just appears more mature. A dainty girl of good weight with a lithe elegant body with proportionate slender limbs that finish in neat oval paws with balancing length to nicely shaped tail. She has a gently rounded

top to her head with good width between her well shaped ears that sit on a broad base with rounded tips and are set with a slight forward tilt their outer edge following the contour of her wedge but that she was tending to hold high today. Her profile shows generous depth to her head with a gently rounded brow with a distinct break to her short straight nose. She has a short wedge shaped head that would benefit from more width and strength to her muzzle. She has lovely large expressive pale chartreuse eyes, which are very well set with the top line slanting towards the nose and a fuller more rounded bottom line set well apart to give the typical glowering expression. Super texture to her short fine close lying coat that is a pretty mingling of a pale blue and cream. A happy little girl!
